

BLE Smoke & Fire Curtains

AL HABTOOR CITY HOTELS COLLECTION - DUBAI

Combining three world-class hotels (the St. Regis Hotel, the W Hotel and the Westin Hotel) Al Habtoor City offers unsurpassed luxury & a staggering 1600 guestrooms & suites. Located on Sheikh Zayed Road, Al Habtoor City also features a 1300 seat permanent water-themed show, a tennis academy, clubhouse and a variety of international restaurants.

Working alongside UAE distributor Energy International, BLE were asked to design and manufacture fire curtains to protect Al Habtoor's numerous generator rooms. Located in the basement of the hotels, the fire curtains prevent fire from extending into the generator rooms and into the car parks.

Speaking of the project, BLE Managing Director Nigel Ward has said "Given the scale of this project - spanning three separate hotels, it was crucial that we engineered a fire containment solution that would be both reliable and resilient. Thank you to Energy International for their co-operation on the project, we look forward to working again with them in the future."
