

BLE Smoke & Fire Curtains

EZDAN PALACE HOTEL - QATAR

Due to open in early 2018, the Ezdan Palace Hotel offers five-star accommodation with easy access to the Hamad International Airport. With refined Andalusian architectural design, its 194 lavishly appointed rooms and suites have been carefully designed to ensure comfort and relaxation for all guests - from regular tourists, to business leaders and Heads of State.

Working with distribution partner Energy International, BLE provided smoke curtains for the entrance lobby atrium. “Our goal was not just to provide effective smoke containment, but to provide a solution that would also blend in seamlessly with the luxurious surroundings” says BLE Managing Director Nigel Ward. “Our SC1 smoke curtains provided a perfect, discreet solution for this as they remain hidden until deployed”.
