

BLE Smoke & Fire Curtains

Kingdom Tower Mall - Riyadh

Standing tall in Saudi Arabia's capital city, the Kingdom Tower Mall is one of the biggest landmarks in Riyadh, housing dozens of luxurious stores and restaurants.

Working with distribution partner Energy International, BLE was asked to manufacture & supply several smoke curtains for the Tower's Robinsons store. In the event of an emergency, once deployed the curtains will help channel smoke in the required direction, as part of a smoke and heat exhaust ventilation system (SHEV).

Speaking of the project Energy International Sales Engineer Shadi Qazza has said, "For this project we required an unobtrusive solution, that would be simple to install, operate and maintain. BLE smoke curtains were the obvious choice, given their reliability and ease of use".
