

## BLE Smoke & Fire Curtains

### MINISTRY OF INTERIOR - QATAR

Composed of multiple buildings with large panoramic atriums, Qatar's Ministry of Interior presented a unique challenge for BLE.

Located in the Al Rayyan district, the building is home to several important state departments including Public Security, Traffic and Passports / Visa requests.

Working with distributor Energy International, BLE provided smoke curtains for the project's atriums, as well as fire curtains for all the louvered doors in the mechanical rooms.

Speaking of the project Energy International Sales Manager Ziad Khaled has said "As always we were delighted to work with BLE on this project. They provided us with excellent service and we look forward to working with them again on numerous other projects in the region".
